

Creation of the Telegram bot step by step

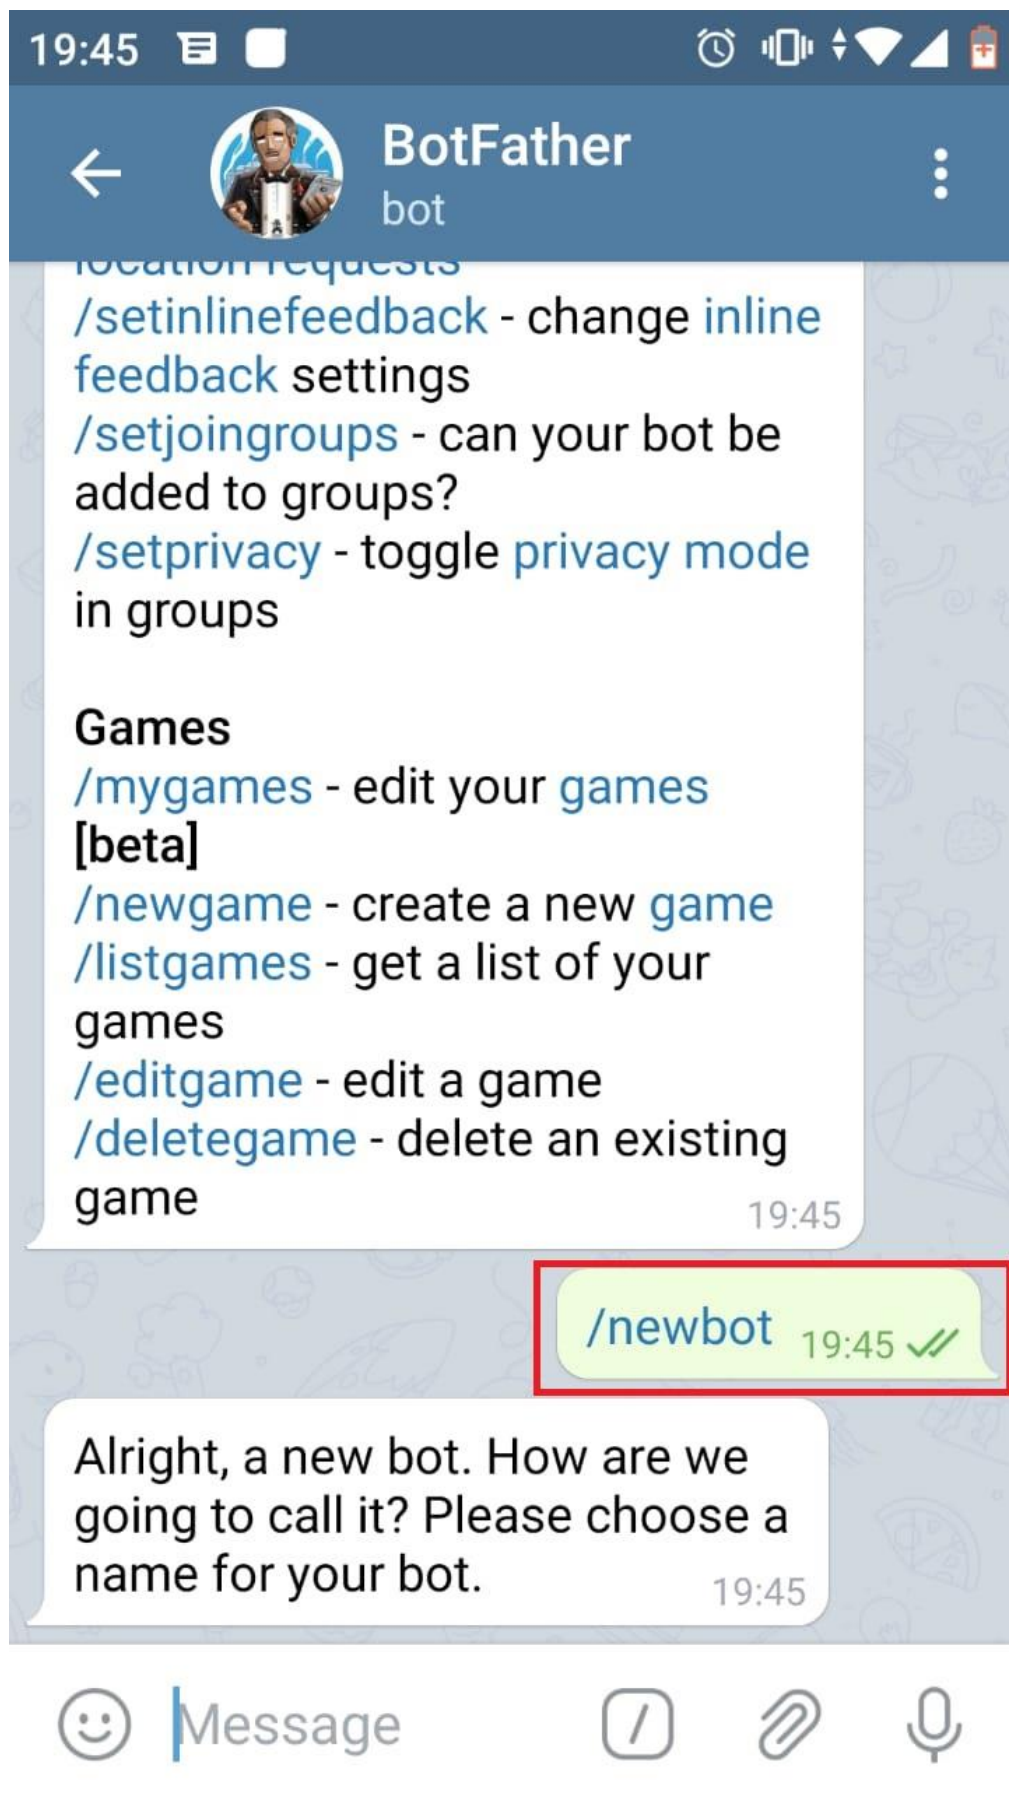

1. First step is to have a Telegram Bot. To create it, open your Telegram app, search for: **@BotFather** and click on it:

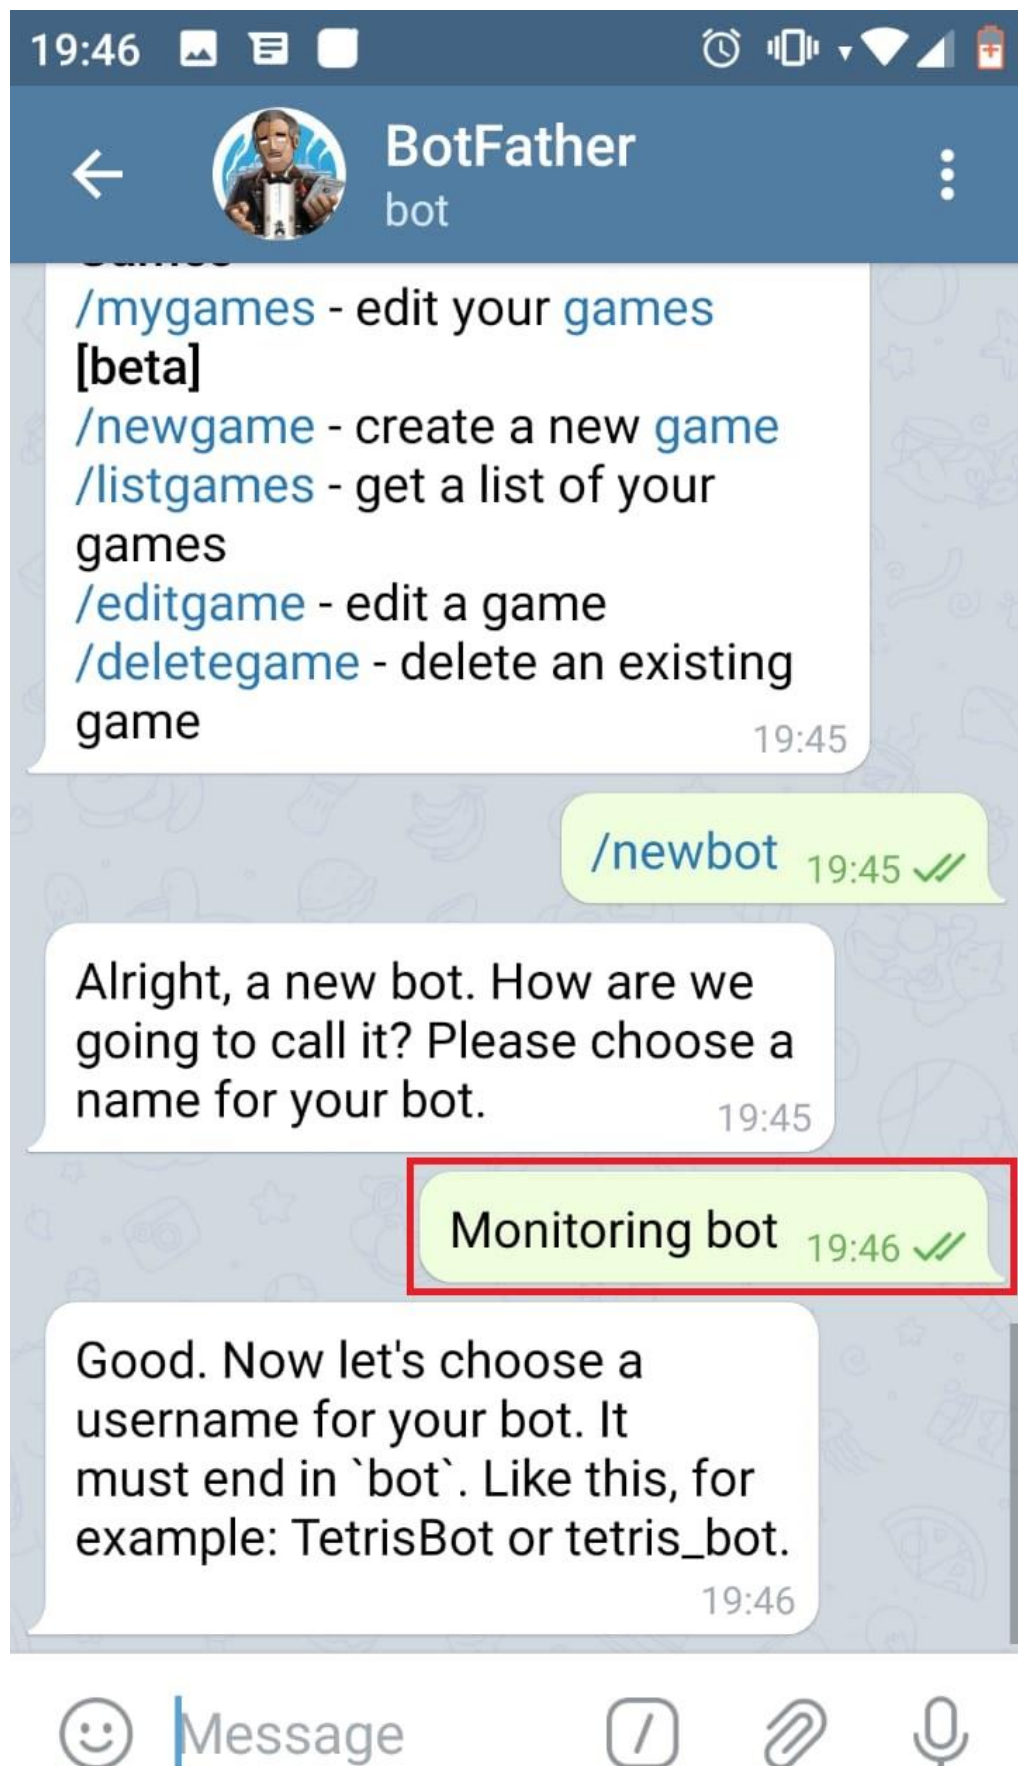

2. Click in Start:

3. Run the command: **/newbot**

4. Enter the **name** of your bot.

5. Enter a username. The username must end with the word bot.

Ex: Monitoringbot, Monitoring_bot.

Once this is done, you will receive a **Token**.
